

# The Future of Renewable Energy In Australia

## FREE PUBLIC LECTURE

**When,**  
Wednesday 14th July,  
6pm – 8pm

**Where,**  
The Spot, Basement  
Theatre, Economics and  
Commerce Building,  
198 Berkeley Street  
University of Melbourne  
*No bookings required*

The *Zero Carbon Australia Stationary Energy Plan* - to be launched at this seminar - argues that it is technically possible for Australia to reach 100 per cent renewable energy within a decade, and that the technology to achieve the transition is already commercially available. This event brings together key voices in the renewable energy debate to explore the state of the industry, survey the critical decade ahead, and discuss the challenges facing a zero carbon roadmap.

### Speakers:

Dr Keith Lovegrove (Solar Thermal Group Leader, ANU)

Lane Crockett (General Manager, Pacific Hydro)

Matthew Wright (Executive Director, Beyond Zero Emissions)

Dr John Daley (CEO, Grattan Institute)

### Panel:

Assoc Prof Peter Seligman (University of Melbourne)

Andrew Dyer (Director, BrightSource Energy)

Patrick Hearps (University of Melbourne)

**Chair:** Prof Mike Sandiford (University of Melbourne)
